

Whispering Pines™

Napa Valley Cabernet Sauvignon are consistently excellent wines but it takes a special skill bordering on art to source and blend these wines to make them truly exceptional. Quite often the top producers are caught with an excess of stock. This happened during the recession of 2008 and has recently occurred due to over-abundant harvests and now exacerbated by the COVID-19 induced recession.

These top name wineries will discreetly offer these fine wines to an insider market through agents and brokers who are trusted for their discretion. We work closely with one of these most trusted and active intermediaries who is also a master wine blender giving us the opportunity and resources to source the best bulk and components in the perfect proportions to give us the highest quality Napa Valley Cabernet Sauvignon that you can put in a bottle. Because we receive fantastic pricing, we can pass the savings on to the consumer for remarkably affordable prices. Of course, we are sworn to secrecy as these renowned vineyards would not want the public to know of our offerings being sold at a 1/3 to a 1/4 of their prices.

So, enjoy and drink up these fantastic, best of Napa Valley wines, while the opportunity is here.
